

LCMS Operator Manual & Access Credentials

How to sign in, navigate every portal, and run the everyday workflows of the LifeCare CMS assisted-living platform — one platform, one resident record, connected care.

15 staff logins

Shared password · GoldenHearth2026

Community: Golden Hearth Care

Updated Aug 2026

GETTING STARTED

Signing in

Every role uses the same sign-in screen. LCMS reads your role from your account and takes you straight to the right portal.

Sign in

Open `/login`, enter your **email** and **password**, and select **Sign In**. You land on your portal dashboard automatically.

Use the **sun / moon** button (top-right of the login card) to switch light and dark themes.

Every account here uses

Password: **GoldenHearth2026**

Change it anytime from the **profile menu** → **Change Password**. New staff can be added by an Admin from the Staff Registry and can sign in immediately.

Base address. In development the app runs at `http://localhost:3001` — the paths below (e.g. `/nurse`) hang off that address. On your deployed site, use your own domain.

ACCESS

The 15 staff logins

One representative account per role, Super Admin down to Maintenance. The Platform Admin (SaaS owner) account is intentionally excluded. All are active unless flagged.

ROLE / PORTAL	NAME	EMAIL	PASSWORD	OPENS	STATUS
Super Admin	System Admin	admin@goldenhearth.com	GoldenHearth2026	/superadmin	Active
Facility Admin	Golden Hearth Facility Mgmt	facility.admin@goldenhearth.com	GoldenHearth2026	/facility_admin	Active
Billing & Finance	Golden Hearth Billing	billing.admin@goldenhearth.com	GoldenHearth2026	/billing_admin	Active
Physician	Dr. Alan Reyes	alan.reyes@goldenhearth.com	GoldenHearth2026	/physician	Active
Head Nurse	Sarah Jenkins	sarah.jenkins@goldenhearth.com	GoldenHearth2026	/nurse	Active
Caregiver	Caleb Randall	caleb.randall@goldenhearth.com	GoldenHearth2026	/caregiver	Active
Family Sponsor	John Pendelton	john.pendelton@family.com	GoldenHearth2026	/family	Active
Resident	Arthur Pendelton	arthur.pendelton@resident.com	GoldenHearth2026	/resident	Active
Fleet Manager	Marcus Dela Cruz	fleet.manager@goldenhearth.com	GoldenHearth2026	/fleet_management	Active
Driver	James Miguel	james.miguel@goldenhearth.com	GoldenHearth2026	/driver	Active
Security	Ramon Bautista	security.guard@goldenhearth.com	GoldenHearth2026	/security	Active
Nutritionist	Facility Nutritionist	nutritionist@goldenhearth.com	GoldenHearth2026	/nutritionist	Active
Kitchen	Kitchen Staff	kitchen@goldenhearth.com	GoldenHearth2026	/kitchen	Active
Housekeeping	Housekeeping Staff	housekeeping@goldenhearth.com	GoldenHearth2026	/housekeeping	Active
Maintenance	Maintenance Staff	maintenance@goldenhearth.com	GoldenHearth2026	/maintenance	Active

Handle with care. These are shared demo credentials for a training environment. For a live facility, give each person their own login and a private password, then retire this shared password.

ORIENTATION

Screen basics — the same controls everywhere

Once you know these, every portal feels familiar. They behave identically across all 15 roles.

The left sidebar

Your tools, organized into collapsible **groups** (Overview, Clinical Monitoring, Resident Care, Operations, and so on). Click a group heading to expand or collapse it; click any item to open it. The  button at the top collapses the whole sidebar to icons.

The top bar

Company selector (left) switches facility if you manage more than one. The **bell** shows your notifications — automated alerts land here. Your **profile menu** (right) holds Settings, Change Password and Log out.

Buttons & confirmations

Primary actions are the solid blue buttons (**Save, Create, Assign**). Anything destructive asks first in a pop-up with a red icon — **Confirm** or **Cancel**. After an action a small **toast** slides in bottom-right: green = done, red = something went wrong (with the reason).

Lists, search & export

Most screens have a **search box**, **filters** (priority, status, date range) and paging. Where a report exists, an **Export CSV** button downloads exactly what you're viewing.

Automated alerts. LCMS watches the data and raises alerts on its own — abnormal vitals, missed medications, overdue tasks & follow-ups, low stock, and weight loss — delivering them to the right team's notification bell. No one has to go looking.

PORTALS · ADMIN & OVERSIGHT

Running the facility

Oversight, staffing, money, and governance.

Super Admin

Whole-facility operations & system control

- **Reporting & Care Intelligence** — facility dashboard, KPIs, trends.
- **LCMS Feature Matrix** — turn features on/off per role (access control).
- **Admissions & Registration** — enroll a new resident via the step-by-step wizard.
- **Staff Registry** — add staff, approve/disapprove, edit records.
- **AI Assistant** & **Landing Studio** — ask questions; customize the public landing page.
- **Audit Log** — every action, who did it and when.

Facility Admin

Day-to-day operations of one community

- **Residents · Staff · Rooms · Occupancy** — the operational registers.
- **Incidents** & **Clinical Coordination** — track and route issues.
- **Medication & Inventory** and **Purchase Requests** — stock plus the restock workflow.
- **Resident Services · Maintenance · Concierge · Front Desk · Unit Turnover** — hospitality ops.
- **Reports** — incidents, staff, residents, with CSV export.

Billing & Finance

The money hub — charges to receipts

- **Transactions Ledger** — every charge by source; tick pending charges → **Generate Invoice** .
- **Receivables & Aging** — what's owed, bucketed by age.
- **Revenue by Source** — collected vs outstanding per stream.
- **Invoice Generation** — **Mark Sent** notifies the resident & family.
- **Payment Processing · Insurance · Receipts** ; **Online Payment** is built but off until a provider is chosen.

Security

Safety & patrol

- **Security Command** — shift overview.
- **Security & Incident Log** — file and review incident reports.
- **Camera Activity Log** — review flagged camera events.
- **Time Clock** — clock in and out.

Care & monitoring

Physician, nurse and caregiver share one resident record — everything they log is instantly visible to the others.

Physician

Medical authority

- **Medication Orders** — **Approve & Sign**, Hold, or Discontinue.
- **Assessment (Case Review)** & **Care Planning** directives.
- **Consults & Referrals** — answer and co-sign.
- **Clinical Coordination** — respond to SBAR escalations.
- **Clinical Notes** & **Secure Messages**.

Head Nurse

Clinical care lead

- **Clinical Monitoring** — Vitals Monitor, Task Assignment, Camera, Daily Rounds, MAR, together in one group.
- **Task Assignment** — **Assign Task** delegates to a caregiver (nurse/supervisor only).
- **MAR** — mark each dose Given / Refused / Held with a reason.
- **Clinical Coordination** — raise an SBAR escalation to the physician.
- **Shift Endorsement** — review the Carry-Over panel, then sign the handover.

Caregiver

Daily assistance

- **Clinical Monitoring** — Vitals Monitor, Camera, Task Assignment, Daily Rounds, MAR.
- **Task Assignment** — tick the checkbox to complete an assigned task (caregivers execute, they don't assign).
- **Daily Rounds** — 10-area bedside documentation (vitals, meals, elimination, mobility, mood, pain, sleep, skin).
- **Call Bells** — respond to resident calls.
- **Time Clock** — clock in/out; **Shift Endorsement** for handover.

Transparency for families

Read-only where it should be — families see and pay, residents see their own care.

Family Sponsor

Monitor your relative

- **Dashboard & Health Timeline** — live vitals and daily comfort summaries.
- **Care Team · Care Planning · Alerts · Messages** — stay in the loop, message staff.
- **Appointments · Transport · Hotel Services · Community & Events** .
- **Billing** — view invoices, pay, and print receipts. New invoices arrive as a bell notification.

Resident

My care portal

- **Dashboard** — your own vitals and daily report.
- **Messages · Appointments · Transport** .
- **Hotel Services · Community & Events** — request services, RSVP to activities.
- **Care Record · Care Planning · Medications** — your own information, read-only.

PORTALS · OPERATIONS & SERVICES

Transport, dining & upkeep

The teams that keep the community moving, fed, clean and repaired.

Fleet Manager

Transport dispatch

- **Transport Requests** — approve & schedule rides.
- **Trip Board** — live trips.
- **Vehicles · Drivers · Maintenance · Fuel** — keep the fleet road-ready.

Driver

On the road

- **Trip Board** — your assigned runs.
- **Inspection Checklist** — pre-trip vehicle safety check.
- **Fuel & Odometer** — log fuel and mileage.

Nutritionist

Dietary & nutrition

- **Diet & Nutrition Orders** — set each resident's diet type & restrictions.
- **Kitchen — Cook List** — review what's being prepared.
- **Dining & Compliance** — track meal adherence.

Kitchen

Food service

- **Kitchen — Cook List** — today's active diet orders, grouped by meal, so you know exactly what to prepare.

Housekeeping

Rooms & cleaning

- **Housekeeping Requests** — work the cleaning & laundry queue.
- **Unit Turnover** — advance a room make-ready → inspection → ready → occupied.

Maintenance

Repairs & engineering

- **Maintenance Requests** — work resident repair & HVAC tickets.
- **Facility Maintenance** — preventive schedules (generator, elevator, fire safety, pest).

DO IT

Key workflows, step by step

The everyday tasks that cross roles — where to click and what happens.

Assign & complete a care task

- 1 **Nurse assigns.** [/nurse](#) → [Task Assignment](#) → **Assign Task** → pick the resident, the caregiver, priority and due time → **Add Task**.
- 2 **Caregiver sees it.** [/caregiver](#) → [Task Assignment](#) shows the checklist, newest first. Tick the box to mark it complete.
- 3 **If it slips.** An overdue task auto-alerts the nurse & facility admin in their notification bell.

Give a medication (MAR)

- 1 **Open the record.** [/nurse](#) → [Medication Administration Record](#).
- 2 **Log the dose.** Mark it **Given**, or **Refused** / **Held** — a reason is required for the last two, plus a witness where needed.
- 3 **Missed doses.** A scheduled dose left un-given for 30+ minutes flips to Missed and alerts the team automatically.

Escalate a clinical concern (SBAR)

- 1 **Raise it.** [/nurse](#) → [Clinical Coordination](#) → new escalation. Fill **S**ituation, **B**ackground (auto-filled from history), **A**ssessment, **R**ecommendation, and set priority.

- 2 Physician responds.** [/physician](#) → [Clinical Coordination](#) — acknowledge, reply with orders, resolve. The SLA clock turns red if it breaches.

Endorse a shift

- 1 Check what's open.** [/nurse](#) → [Shift Endorsement](#) — the **Carry-Over & Unresolved** panel lists open escalations, pending/overdue tasks and due follow-ups with priority and time.
- 2 Write & sign. New Report** → fill the handover → **Sign** to validate it. It appears instantly to the incoming shift.

Bill a resident and send the invoice

- 1 Gather charges.** [/billing_admin](#) → [Transactions Ledger](#) — tick a resident's pending charges → **Generate Invoice**.
- 2 Issue it.** Set the due date, then **Create & Send**. The invoice is marked Sent and the resident + family get a bell notification and can view/pay it in their portal.

Restock inventory (purchase request)

- 1 Raise a request.** [/facility_admin](#) → [Purchase Requests](#) → **New Request** (link an inventory item to prefill), set quantity, cost and priority → **Submit**.
- 2 Move it along. Approve** → **Mark Ordered** → **Mark Received**. Receiving automatically adds the quantity back to stock on hand.
